JAMES H. BAKER, of Ross. WILLIAM H. GIBSON, of Seneca. FOR JUDGES OF THE SUPREME COURT. JACOB BRINKERHOFF, of Richland.

CHAS. C. CONVERS, of Muskingum. FOR ATTORNEY GENERAL, FRANCIS D. KIMBALL, of Medina; FOR MEMBER OF THE BOARD OF PUBLIC WORKS, ALEX. G. CONOVER, of Mismi.

Thursday Morning Sept. 20,1855 our Public Works.

The people of Ohio, of all parties, have become thoroughly convinced that there is rank corruption as well as gross incapacity dread is the prevalence of the mischievous in the management of our public works,---Facts are daily coming to light that confirm the truth of these views. Papers along the line of the canals contain frequent exposures of these vampires upon the body politic.

The Circleville Herald brings forth the following facts that are worthy the considcration of the tax payers of Ohio. Almost every district of the State could present similar facts. It is high time that these Yontzes, and Muirines, and Barneys, were again driven from the public crib. There will be abundant work for another "committee on rascality" when the reform Legislature gets hold of these scamps.

The Herald says: "We charged in our former article that the Public works are grossly mismanaged. This charge has not been denied, nor will it be. For evidence of the truth of the charge, we need not go away from our own fruits are familiar to us all." vicinity. The canal in our immediate viof properly taking out the accumulations in ing the banks higher, and putting plank on the top of the dam to accumulate sufficiont water to fill the levels below. This planking we are informed is swept off by every little freshet, so that it has frequently to be replaced. If the present method of repairs is continued much longer, it will be next to impossible for an empty boat to make its way through the canal. We have within a few days heard it remarked, that the canal has not been in navigable condition from Cleveland to Portsmouth for more than two weeks during this season tack of the Enquirer. And we are also aware that the boatmen are loud in their complaints of the way the

scter and standing.
We also intimated in our former article, that there has been peculation and corruption in office upon the part of subordinates. A man was appointed Superintendent of a district not a thousand miles from this place, who at the time of the appointment, was utterly bankrupt. His paper, of which there was a considerable amount outstanding, was worth little or nothing .--Yet this man, on a salary of six hundred dollars a year, was able in three or four years to pay his dehts, remove the leins that were upon his real estate, and buy a farm for which he paid some six or seven thousand dollars, and paid most of it down, and at the same time boasted that he had fifteen hundred dollars worth of personal

property.

In another district with which we are acquainted, the superintendent made almost as good a thing out of his office.-When appointed he was not very well-off in this world's goods, but now he has a fine residence, one of the finest there is in the town, in which he resides. These cases we dare say are by no means singular and may be regarded as examples.

The engineer on the canal in this viciniwhich a large share of his time is devoted, time for which the State pays him. He, too, is utterly incompetent for the proper discharge of the duties of the office, and

shall pursue it still further. We have of Locofocoism, he thought a light one .more facts which we shall give to our rea- He ridiculed any attempt to lessen the bur ders. He breathed no word of hope of exposing, as we can, the rescality and under Lecofoco rule. He promised no recorruption of those in office.!

The times was, in the early political history of Ohio, when the only things taken into consideration in the same lection of public officers, were their honesty and capability. Men depended upon their individual merits for election, and their individual merits for election, and did not have to rely upon receiving the nomination of a corrupt elique.
